## ProbiFerm L for Cats & Dogs

A liquid multi strain probiotic cultured on alfalfa, primarily lactic acid producing organisms, adapted to survive stressful conditions by utilizing alternative sources of energy (such as starch) and multiplying rapidly. It stabilizes the microbiome in the digestive track, optimizing digestion and nutrient absorption. It can also inhibit some pathogenic pathogens such as E. coli, Clostridium and Salmonella.

## ProbiFerm L for Birds

A liquid multi strain probiotic cultured on alfalfa, primarily lactic acid producing organisms, adapted to survive stressful conditions by utilizing alternative sources of energy (such as starch) and multiplying rapidly. It stabilizes the microbiome in the digestive track, optimizing digestion and nutrient absorption. It can also inhibit some pathogenic pathogens such as E. coli, Clostridium and Salmonella. It further reduces recovery time for racing pigeons and cage birds.

## Athridin for Cats & Dogs

A supplement containing chondroitin, glucosamine, aloe vera, vit D3 and the natural super antioxidant Biored. Formulated to aid during the treatment of arthritis in cats and dogs.

## Doggy Cereal for Dogs

A supplemental feeding, just add water, to be fed to dogs, containing a specialized starch, protein and a combination of vitamins, minerals, probiotic and antioxidant.

## Dogmel for Dogs

A supplemental, low lactose, feeding for adult dogs, containing a combination of vitamins, minerals, probiotic and antioxidant.

## Pupmel for Puppies

A supplemental/alternative feeding for puppies still drinking milk. Contains colostrum, vitamins, minerals, probiotic, antioxidant.
